}
```

Gateway Error Example

```
{  
  "status": 500,  
  "error": "GATEWAY ERROR",  
  "message": "Gateway error"  
}
```

Note Better(N/B):

- Ensure that email is valid when creating or fetching journals.
- File uploads for attachments must be within the allowed size limits - Needed to configure the configs accordingly to achieve the needful.
- Categories must exist before assigning them to a journal.
- Journals must belong to a valid user.
